EDUCATION	**University of Southern California**	Los Angeles, CA	2016.05
	Master of Science in Computer Science GPA: 3.93 / 4.0		
	University of Southampton	Southampton, UK	2013.06
	B.S. Computer Science GPA: 3.59 (Evaluated by World Education Services)		

SKILLS   Java, NodeJS, PHP, Python, HTML/CSS, JavaScript, Git, SQL, MongoDB, AngularJS, C#, C

WORK EXPERIENCE

Symantec   Summer Intern   Culver City, CA   2015.06 - Now
● Writing and documenting SQL queries to debug a C# data migration tool.

SchooLinks   Summer Intern   Los Angeles, CA   2015.05 - 2015.06
● Developed PHP unit testing scripts, Python data scraping scripts.
● Developed Admin dashboard with statistics using Google Charts API.

Credit Suisse   Summer Intern   London, UK   2012.06 - 2012.07
● Aimed at replacing Windows XP systems with Win7 in large scale and high efficiency.
● Developed PowerShell scripts to locate target systems by filtering parameters such as region, build status and users, without manually entering computer names, address or asset numbers.
● Aimed at automating the system scheduling process, which includes system wakeup, shutdown and rebuild.

PROJECT EXPERIENCE

REFERsy.com   Project Manager   2014.08 - 2015.05
● Developed a job referral website using PHP CodeIgniter framework for CSCI577a&b Software Engineering with another 6 students.
● Jobs are retrieved from Indeed.com API and friends' employment information are retrieved from LinkedIn, Facebook and Google+ APIs
● Friends employment information (particularly company names) is matched with company names returned by Indeed API, after which users can send referral messages to their friends.
● I was the project manager and developed the Indeed API controller and the user interface for search and profile pages.

EasyReg - USC Mobile App Competition for Web Registration   2015.02
● http://www.donglinpu.me/easyreg
● Our team participated in the 1-month event and created a multiplatform mobile app using AppGyver Supersonic UI framework, Angular.js, FullCalendar and jQuery UI.

Microsoft Open Hack 2015   http://ftd.herokuapp.com   2015.01
● Teamed up with another 3 classmates and built a web app that shares updates to Weibo, Facebook and Twitter with translation and drag-drop feature.
● I came up with this idea, developed the server in NodeJS and implemented the login, posts retrieval and posts publishing functions of Weibo and Twitter.

Google Map Multiple Waypoints Extension   2014.11
● Code available on https://github.com/Dongminator/GoogleMapMultiWaypoints
● Created a JavaScript function during HackSC to work around the limit that Google Map API only allows a maximum of 8 waypoints for each route request.
● Splits waypoints into multiple routes and links the routes segments together.

A location based web app for travel experience sharing   Southampton, UK
Supervisor: Dr. Thanassis Tiropanis   2012.09 - 2013.05
● Available on http://routes.donglinpu.me
● The final year project allows users to share travel routes on Google Map.
● Routes generated automatically based on geographical information of photos from Facebook and photos arranged in chronological order on each route.
